Thintanks

Thintanks is about innovation, research and development. The thought of having to install a circular rainwater tank in the backyard of a modern home led to the conclusion that there was a need for more environmentally appealing solution. The obvious answer was to make a rainwater tank that looked like a fence. Once the decision was made it was automatically followed that the tanks is made as thin as possible. The modern and stylish tanks are an excellent space-saving solution. Thintanks are certified protected Australian Registered Designs, developed and manufactured in Australia and compliant with all AS/ NZ Standards. Thintanks are manufactured with the unique high precision tooling coupled with high quality material, results in extra longevity and durability.

1 x 1000L tank against wall.

Plant wall feature

2 x 1000L tanks forming a screen for external carport.

Benefits of Thintanks:

- Australian made and manufactured from 100% UV stabilised, food grade polyethylene resin
- To ensure maximum strength, all Thintanks are made of solid one piece construction
- Aesthetically pleasing appearance
- Designed to suit any location
- Can be positioned alongside a fence, against house wall
- Can form an internal courtyard
- Can screen off the backyard
- Provides minimum intrusion on your property
- Use any number of tanks to achieve the desired capacity
- Large colour range
